

# AP9405 AIR PURIFIER KSSMX-002A

**Pure Vital Air technology brings relief to allergy sufferers around the world. It generates an equal amount of positive and negative ions that destroy viruses, allergens and fungal spores.**

**A purifier with patented Pure Vital Air ion technology that brings relief to allergy sufferers around the world.**

**The device allows 220 m<sup>3</sup> to be filtered within an hour. And it works perfectly in the rooms to 40 m<sup>2</sup>.**

Purification technology	multi-stage with HEPA 13
Cleaning efficiency	99.9%
Air filtering	6 stages
Filters	carbon, catalytic, antibacterial, HEPA13
Air pollution sensor	Yes
Humidity sensor	Yes
UV lamp	Yes
Water level indicator	Yes
Filter wear indicator	Yes
WiFi control	No
Room sizes	40 m2
Performance	220 m3 / h
Humidification function	Yes

Ionization function	Yes
Night mode	Yes
Timer	Yes
Remote control	Yes
Power	65W
Sterilization function	Yes
Operating mode	3 stages
Parental lock	No
Noise level	55db
Min. Noise level	22db
Internal temperature measurement	No

*Other*

EAN code	5907265011473
Product model	AP9405

## DESCRIPTION

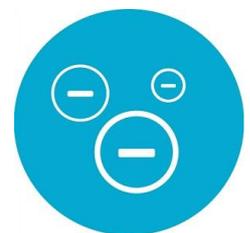

### Choose the 2in1 model - purifier? With a humidifying function

Humidification is an additional functionality of this purifier. The device helps to maintain air humidity at the required level. You can breathe freely even during the heating period. It has a chip with a sensor that controls the intelligent humidification system, which ensures that it always maintains the humidity parameters at the level recommended by the WHO \*.

### Ionizer with a capacity of 20,000,000 ions / cm³

**Pure Vital Air** Technology is a patented ion technology that brings relief to allergy sufferers around the world. It consists in generating a large amount of anions that destroy viruses, allergens and fungal spores.

The effectiveness of **Pure Vital Air** reaches 99.9%. In addition, thanks to ionization, the air is fresh as after a storm.

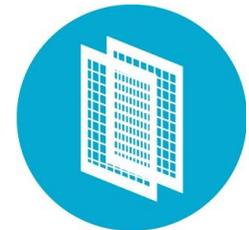

## 6-stage Pure Vital Air filtration with HEPA 13

- **Catalytic cold filter** : cleans from formaldehydes, benzene and TOV
- **Antibacterial filter (5 microns)** : Removes fine particles, mites, germs and bacteria.
- **HEPA H13 filter** : stops at least 99.97% of mechanical impurities, including PM 2.5, fungal spores, bacteria and most viruses
- **Carbon filter** : removes volatile compounds from the air, incl. benzene, formaldehyde, xylene, benzo (a) pyrene, and odors

## High efficiency of filters

Thanks to the intelligent system for reading the filter quality, the device will inform you about the need to replace them. Guaranteed certainty and efficiency of operation without additional controls.

## Easy to use and clear control panel

All functions of the purifier can be found on a simple-to-use touch panel. You will be able to freely configure the device to the parameters you choose or set the Auto mode, which will automatically adjust the purifier to the conditions in its space.

## Remote control for remote control of the device

Easily control the purifier settings without having to approach the device for your comfort and convenience.

## TIMER for increased efficiency

This function makes it possible to automatically turn off the device in the range you choose.

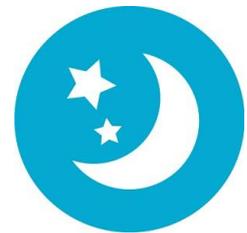

In practice, it works like this: if you want the purifier to finish its work after 4 hours, I start the timer function and enjoy the guarantee that it will happen!

## Activate night mode and place the purifier in the bedroom

The night mode starts the purifier at very low speed, thanks to which its operation is quiet. You can easily put the device in the bedroom without worrying that it will disturb your and your family's sleep.

## Quiet and energy-saving

The purifier has been designed in such a way as to reduce noise as much as possible. The sound produced during sleep mode is almost imperceptible so that our rest or sleep will not be disturbed.

### TECHNOLOGIES

- **Cold catalytic filter** - catalyzes formaldehyde, benzene and volatile organic compounds (VOC),
- **Cell filter with active carbon** - absorbs odors (hydrogen sulfide), breaks down formaldehyde, benzene, ammonia, cigarette smoke and other harmful gases emitted by e.g. furniture, wallpaper, carpets, etc.
- **Antibacterial filter** - 5 micron filter with antibacterial agent removes fine particles, mites, germs and bacteria
- **HEPA 13 filter** - high efficiency: with a filtration efficiency of over 99.7%, it removes particles larger than 0.3 microns, such as: mold, dust, allergens, bacteria, etc.
- **UV sterilizer** - (UV-C lamp): the light with a wavelength of 365 nm emitted by the UV-C lamp is bactericidal and kills viruses.

- **Anionic ionizer** - effectively ionizes the air by emitting negative ions, giving the effect of fresh air after a storm
