

ORO-AIR PURIFIER COMBI XL

with HEPA filter, Ionizer & Humidifier Function (water filter) + Remote
Designed for an area not exceeding 60m².

KSSORO-005a

The **ORO-AIR PURIFIER COMBI XL** air purifier with **multi-level filtration and HEPA filter** Efficiency in capturing 0.3 micron particles, 1/800 the thickness of a human hair. **It has a positive effect on health** . High efficiency ensures excellent indoor air quality. The purifier is designed for an area not exceeding 60 m2.

- **Power supply:** 110V-220V
- **Power:** 60W
- **Weight:** 7.5 kg
- **Dimensions:** 640x352x190 mm
- **Filter types:** Pre-filter, HEPA, NANO catalyst, Activated carbon, Water filter
- **Humidification function**
- **Air flow:** 480 m³ / h
- **Number of anions:** 10,000,000 pcs / cm³
- **Timer:** 1/2/3/4/5/6/7/8
- **Loudness:** ≤ 62 dB
- **Working area:** 33 - 57m²
- **HEPA filter:** > = 0.1 nm

ORO-AIR PURIFIER COMBI XL

- **Activated carbon absorption level: 28 mr**
- **White color**
- **UV lamp**
- **Ionization**

Multi-level air filtration, thanks to the use of up to 4 types of filters + UV lamp

- 1. Pre-filter**
- 2. HEPA filter**
- 3. Carbon filter and NANO catalyst (2 in 1)**
- 4. Water filter**
- 5. UV lamp**

It has a humidifying function (water filter). Which additionally stops, filters and moisturizes the purified air.

The appropriate level of air humidity allows to minimize the drying of the skin and eyes. It also allows people who are particularly sensitive to dry throat to breathe easier. Our devices humidify the air, ensuring the optimal level of humidity. A single tank filling is sufficient for approx. 8 hours of operation, depending on the humidity in the room.

Air quality meter

The device has an air quality meter, thanks to which it automatically adjusts the operating mode to the conditions in the room.

Ionization

The ionizer releases electrons into the flowing air which combine with particles to form anions which then adhere to dust, dirt, cigarette smoke and allergens to form larger particles which are finally caught by the positively charged filter.

ORO-AIR PURIFIER COMBI XL

Air ionization to eliminate unpleasant aromas, bacteria, viruses, mold and fungus spores, allergens.

UV filter

The work of filtering devices is supported by a UV lamp, which has antibacterial properties and effectively breaks down organic elements and toxic substances.

HEPA filter

High-performance air filter for disinfection. Made of sintered glass, it provides air filtration through pores of 0.3 μm .

Retains **at least 99.97% of impurities larger than 0.3 μm** , as well as: cells of fungi, protozoa and bacteria, and most viruses.

We use the most modern production technologies. Compact dimensions of the device, modern design. At every stage, we check the quality of our products, because this is the only way we can be sure that they will meet all your expectations.

Thanks to the innovative and advanced, multi-stage filtration system, ORO-AIR PURIFIER COMBI XL stops up to 99.9% of air pollutants, including: allergens, pollen, dust, VOC (volatile organic compounds), suspended dust (PM 2.5; PM10) and unpleasant smells. The built-in ionizer makes the ORO-AIR PURIFIER COMBI XL an excellent device for clean and fresh air and well-being.

Functions of the OROMED ORO-AIR PURIFIER COMBI XL air purifier

ORO-AIR PURIFIER COMBI XL

1. **Cleaning power selection:** 4 fan speeds
 2. **Air ionization with anions**
 3. **Humidification** - additional air purification and humidification
 4. **UV lamp** - neutralization of bacteria and microorganisms.
 5. **Air quality meter** - the device has an air quality meter, thanks to which it automatically adjusts the operating mode to the conditions in the room.
 - Blue - good quality air
 - Blue color - moderately polluted air
 - Purple color - heavily polluted air
 - Red color - very polluted air
- Operating mode:**
- night operation mode - the purifier works very quietly with a blank display,
 - automatic mode,
 - VOC mode - allows you to get rid of contamination with organic compounds.
